Project

Wave Porty:

- An online destination for book enthusiasts. The platform allows users to manage their book collections, engage with other readers, and streamline the book shipping process. This Wave porty using a completed database and laravel framework.

Borre's Outdoor :

- This Project uses a database and a shopify store to manage shopify product status is then updated according to the supplier status.

Bam Good Bricks :

Developed a comprehensive admin and user dashboard with role-based access control. Integrated a third-party API for product search and synchronization. The system enables seamless order syncing between Shopify and BrickLink:

- User & Admin Management: Implemented authentication, authorization, and dashboards tailored for admins and users.
- Product Search Integration: Integrated a third-party API to fetch and display products dynamically.
- Order Synchronization: Automated order syncing between Shopify and BrickLink via webhooks, ensuring real-time inventory updates.
- Inventory Management: Developed a webhook-based system to update Shopify inventory based on BrickLink order fulfillment.

Tech Stack: [Mention technologies used, e.g., Laravel, Shopify API, Webhooks, etc.]
